

Subrata Das

Data Engineer | Azure Databricks | PySpark | ADF | SQL

subratadasworking@gmail.com | +91-7001188620 | Kolkata, West Bengal | linkedin.com/in/subrata-das-7001188620 | github.com/subratadas

PROFESSIONAL SUMMARY

Data Engineer with 4.5 years at Tata Consultancy Services, delivering end-to-end Azure data pipelines using Databricks, PySpark, ADF, Delta Lake, and Synapse Analytics. Shipped 3 production projects for KPMG with zero critical failures. Also comfortable with Angular-based UI integration when needed.

TECHNICAL SKILLS

Cloud and Big Data: Azure Databricks, PySpark, Delta Lake, Synapse Analytics, ADLS Gen2, Blob Storage

Orchestration and ETL: Azure Data Factory (ADF), SSIS, SSIS Integration Runtime

Databases and Warehousing: SQL Server, Azure SQL DB, Data Modelling, SSAS

Languages: Python, SQL, PySpark

DevOps and Tools: Azure DevOps, CI/CD, Git

Visualisation: Power BI

Frontend: Angular, TypeScript, RxJS (Working Knowledge)

PROFESSIONAL EXPERIENCE

Data Engineer

Tata Consultancy Services (TCS), Kolkata | July 2021 - Present | KPMG-TCS SPOC for New Joiner Onboarding (Jan 2022 - Present)

Project 1: Azure Databricks and PySpark Data Platform | Jan - Dec 2022

- Designed and deployed end-to-end PySpark pipelines on Azure Databricks to process high-volume structured and semi-structured datasets, improving throughput significantly.
- Built Delta Lake Lakehouse with ACID-compliant storage, schema evolution, and time-travel; automated orchestration via Databricks Jobs integrated with ADF.
- Implemented window functions, aggregations, and partitioning in Spark SQL to optimise large-dataset performance; migrated legacy on-premise databases to Databricks.

Technologies: Azure Databricks, PySpark, Delta Lake, Spark SQL, ADF, Azure DevOps

Project 2: ETL Modernisation and Data Warehousing | Jan - Dec 2023

- Migrated legacy SSIS workflows to Azure using SSIS Integration Runtime in ADF; developed ETL flows with stored procedures and error-handling across data warehouses.
- Managed data ingestion from ADLS Gen2 and Blob Storage into SQL Server; built SSAS data models and live Power BI dashboards for executive reporting.

Technologies: ADF, SSIS IR, SQL Server, ADLS Gen2, Blob Storage, SSAS, Power BI

Project 3: Cloud Infrastructure, CI/CD and UI Integration | Jan 2024 - Present

- Managed Azure DevOps CI/CD pipelines for automated zero-downtime releases; replaced local dependencies with Blob Storage for distributed orchestration.
- Administered Synapse Analytics, Azure SQL DB, ADLS Gen2, and Integration Runtime; contributed to Angular dashboards surfacing pipeline metrics via REST APIs.

Technologies: Azure DevOps, Synapse Analytics, Azure SQL DB, ADLS Gen2, Angular, REST APIs

Key Achievements

- Reduced pipeline processing overhead by ~45% through Databricks optimisation and Delta Lake adoption.
- Delivered all 3 projects with zero critical production failures; mentored 2 junior data engineers.
- Standardised KPMG onboarding workflows, cutting new joiner ramp-up time across the delivery team.

EDUCATION

B.Tech in Computer Science Engineering | Haldia Institute of Technology | July 2021 | CGPA: 8.3 / 10

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate | Microsoft | December 2024

Python Programming Advanced | HackerRank | August 2022

REST API Design and Development | HackerRank | June 2023
